

SUMMER CAMP PREVIEW WEEK 7: BRANCHING OUT!

At Nature Camp, campers develop an awareness, appreciation, and concern for our environment and the creatures in it. They will explore the habits and habitats of animals and learn how they can care for their environment. Most importantly, they have fun using their imaginations, and just being kids in a low-stress, outdoor environment. Campers learn about natural science through stories, games, crafts, and a host of other fun-filled activities. Here, campers renew old friendships and make new pals.
